

Saiyam Jain

Fullstack Developer

Munich, Germany sjain3243@gmail.com +49 15175929432 www.saiyamjain.de

PROFILE

Fullstack developer with 4+ years in React and TypeScript and 3 years in Java, with a track record of owning features end-to-end — from component design in Figma to backend services and CI/CD deployment. Comfortable leading frontend teams, designing REST APIs, and integrating real-time data pipelines. Currently contributing to Java-based traffic management systems at Yunex Traffic while completing an MSc in Informatik at TU Munich. Seeking a fullstack role with a strong frontend background.

TECHNICAL SKILLS

Frontend	React · TypeScript · Next.js · React Native · Vite · Tanstack · Expo
Backend	Java (3 yrs) · Node.js · Express.js · REST APIs · GraphQL · Kafka
Databases	PostgreSQL · Supabase · Firebase · MongoDB
DevOps	Docker · Kubernetes · ArgoCD · GitHub Actions · Grafana · Prometheus
Languages	German C1 · English C2 · Hindi C2

PROFESSIONAL EXPERIENCE

Working Student – Software Developer (Frontend)

Jun 2024 – Present

Yunex Traffic · Munich

- Contribute to **Java-based** traffic management and intelligent transport systems, implementing backend services for adaptive signal control and integrating them with **React + Vite** frontend modules via **RESTful APIs**.
- Built and maintained live **Grafana dashboards** that visualise traffic KPIs across city intersections using **Prometheus and PostgreSQL**, enabling operations teams to spot signal anomalies in real time.
- Contribute to a **Kubernetes**-orchestrated, Docker-containerised deployment pipeline with **ArgoCD**-driven automated rollouts across production environments.

Frontend Team Lead

Oct 2025 – Jan 2026

Adtran × CSEE Practicum · Munich

- Led end-to-end frontend development of ALMO, a unified fault-management and ticketing platform: **React/Node** web app for admins and a **React Native Expo** mobile app for field engineers — from **Figma designs to production**.
- Architected an **offline-first** mobile experience with **background GPS location tracking** and optimistic UI updates, enabling engineers to operate reliably in low-connectivity environments.
- Delivered comment threads, **multi-role workflows**, and notification systems serving admin, manager, and engineer personas, significantly reducing ticket resolution friction across all three groups.

Co-Founder & CTO

Oct 2024 – Jul 2025

TreueGo · Munich

- Designed and built a cross-platform loyalty marketplace from scratch using **React Native, Expo**, and **Supabase**, enabling local merchants to manage digital rewards without third-party dependencies.
- Architected the Supabase (PostgreSQL) data model for loyalty transactions, merchant dashboards, and reward tracking; implemented **row-level security** policies for **multi-tenant** data isolation.
- Owned all frontend architecture decisions — **state management** strategy, component library design, and CI/CD pipeline via **GitHub Actions** for automated builds and deployments.

Frontend / Fullstack Developer

Oct 2023 – Mar 2024

La Familia Practicum · Munich

- Built the web interface of an **AI-powered** company-tracking platform, connecting data mining outputs and analytics APIs into a **dashboard** with charting, filtering, and reporting features.
- Served as the **fullstack integration bridge** across three teams (data, backend, product) — defining **API contracts** and component specs that reduced cross-team rework.

Working Student – Software Tools

Mar 2024 – May 2024

EcoG · Munich

- **Automated** certificate renewal and device management for **OCPP-compliant** EV charging systems via custom scripting, reducing manual operational overhead.
- Integrated multiple **payment terminal provider APIs** with EcoG's backend, enabling point-of-sale transactions at EV charging stations.

SELECTED PROJECTS

[JainCommunityEurope.com](#)

Aug 2025 – Present

Full-Stack · Next.js · Supabase · Vercel

- Built a live fullstack community platform for 3500+ Jain members across Europe — real-time event coordination, member directory, and serverless deployment; **sole developer** from design to production.

[TravelGreen](#)

Oct 2024 – Jan 2025

Bachelor Thesis · TU Munich

- Designed and implemented a sustainable tourism recommendation system applying **green UX** principles; built with a **React frontend** and evaluated via user engagement metrics.

Hackathons — HackUPC24 · StartHack24 · StartHack25

2024 – 2025

Barcelona / St. Gallen

- Shipped three functional prototypes in 36 hours each: **FarmSmart** (AI agriculture tool), an **ESG investment platform**, and an **AI voice chatbot** for warehouse order management.

EDUCATION

MSc Informatik

Oct 2025 – Present

Technical University of Munich

- Focus: **Machine Learning, Applied AI**, Software Engineering. Studying alongside industry roles at Yunex Traffic, Adtran.

BSc Informatik (Deutsch)

Oct 2021 – Oct 2025

Technical University of Munich

- Core: **Algorithms & Data Structures**, Databases, Operating Systems, Networks, Software Engineering. Programme completed in German (C1).

ACHIEVEMENTS

Reemtsma Scholarship Competitive merit scholarship · €220/month since March 2022 · awarded to top academic performers across Germany.

IIT-JEE Advanced Cleared the world's 2nd most competitive engineering entrance exam · top 0.1% among 1M+ candidates.
